Summary and Accomplishments

- 3 Years of experience in building a e2e web application using Java , Angular as key technologies.
- Worked as UI developer in Angular 4,5,6 for building application for Nielsen.
- Followed Spring MVC pattern for designing RESTFul Web services.
- Worked with Apache POI for Excel creation and manipulation using Java.
- Worked with Google maps API for plotting routes using longitudes and latitudes. Getting longitudes and latitudes for the selected pointed on maps and store it in DB as a location of specific person.
- Used Hibernate for connecting database by writing Entity's, Queries, Criteria's, Projections and Restrictions.
- Followed agile practices, Unit testing using JUnit, Test automation with Selenium, CICD and versioning control system with SVN.
- Did a POC "Jenkins Auto deployment with test criteria" in which Selenium test cases will be triggered in case of any changes in SVN revision. If test result is pass then Jenkins will create a war file for the project and deploy it on the given server details.
- Developed a Selenium framework which is completely keyword driven and integrated same with Jenkins to build jobs remotely. Wrote a blog on the same.
